

*ECONOMÍA* Journal was initially established as the “*Revista Economía*” of the Department of Economics of the Pontificia Universidad Católica de Perú (PUCP) in 1977. It is the oldest academic journal on economics in the country. Building on that legacy, *ECONOMÍA* has now been relaunched as an internationally refereed journal dedicated to publishing original academic research on economics in English, with an expanded and prestigious Editorial Board, as well as a large team of Associated Editors that guarantee the highest theoretical and methodological standards. *ECONOMÍA* also offers a manuscript management platform that provides an efficient workflow among authors, associate editors and referees throughout the process of manuscript submission and evaluation. In this new stage, *ECONOMÍA* aspires to continue leading the progress of academic literature in the country as well as position itself in a prominent place in the Latin American region.

*ECONOMÍA* is a journal of general interest in economics, placing particular emphasis on the Peruvian and Latin-American economies. More specifically, our journal welcomes academic articles of high standards in the following (non-restrictive) areas: macroeconomics, microeconomics, history of economic thought, regional economy, economic history, labor market, economic fluctuations, economic growth, poverty, econometrics, applied economics, economic theory, finances, socio-economic development, environment, energy, health, education, economic policy, exchange rate, inflation, institutions, corruption, crime.

### Some characteristics of the new stage of *ECONOMÍA* are:

- a) Giving authors in all areas of science the opportunity to publish open access.
- b) High visibility thanks to unrestricted online access and inclusion in bibliographic databases and indexes.
- c) Rigorous peer-review and high-quality author services.
- d) Efficient work-flow and submission tracking thanks to management platform.
- e) Easy compliance with open access mandates.
